OTHER DOCUMENTS (Including Author, Title, Date, Pages, etc.)

<i>S</i>	Albota MA, Xu C, Webb WW. 1998. Two-photon fluorescence excitation cross section of biomolecular probes from 690 nm to 960 nm. <i>Appl Optics</i> 37:7352-7356.
<i>S</i>	Anderson GS, Guenther WHH, Searle li, Bilitz JM, Krieg M, Sieber F. 1996. Inactivation of photosensitizing merocyanine dyes by plasma, serum and serum components. <i>Photochem Photobiol</i> 64:683-687.
<i>S</i>	Ara G, Apprille JR. Malis CD, Kane SB, Cincotta L, Foley J, Bonventre JV, Oseroff AR. 1987. Mechanism of mitochondrial photosensitization by the cationic dye, N,N-bis(2-ethyl-1,3-dioxolane)krypto-cyanine (EDKC): preferential inactivation of complex I in the electron transport chain. <i>Cancer Res</i> 47:6580-6585.
<i>S</i>	Baptista, M., Indig, G.L. 1997. Mechanism of photobleaching of Ethyl Violet non-covalently bound to bovine serum albumin. <i>Chem. Commu.</i> , 1791-1792.
<i>S</i>	Baptista MS, Indig GL. 1998. Effect of BSA binding on photophysical and photochemical properties of triarylmethane dyes. <i>J Phys Chem</i> 102B:4678-4688.
<i>S</i>	Bartlett JA, Indig GL. 1999. Effect of self-association and protein binding on the photochemical reactivity of triarylmethanes. Implications of non-covalent interactions on the competition between photosensitization mechanisms type I and type II. <i>Photochem Photobiol</i> 70:490-498.
<i>S</i>	Bartlett, JA, Guilherme, I.L. 1999. Spectroscopic and photochemical properties of Malachite Green noncovalently bound to bovine serum albumin. <i>Dyes and Pigments</i> 43:219-226.
<i>S</i>	Chance B. 1970. Fluorescent probe environment and the structural and charge changes in energy coupling of mitochondrial membranes. <i>Proc Natl Acad Sci USA</i> 67:560-564.
<i>S</i>	Chen LB. 1988. Mitochondrial membrane potential in living cells. <i>Ann Rev Cell Biol</i> 4:155-181.
<i>S</i>	Davis S, Weiss MJ, Wong JR, Lampidis TJ, Chen LB. 1985. Mitochondrial and plasma membrane potentials cause unusual accumulation and retention of rhodamine 123 by human breast adenocarcinoma-derived MCF-7 cells. <i>J Biol Chem</i> 260:13844-13850.
